

ANZSN-Amgen

Quality Assurance Grants Programme

For details of the grants and how to apply, see overleaf.

This Programme is conducted as per the Medicines Australia Code of Conduct

ANZSN-Amgen

Quality Assurance Grants Programme

Significant patient numbers and conflicting priorities in the care of an individual patient, means that the management of CKD presents important day-to-day challenges.

Simple novel initiatives such as introduction of management algorithms for anaemia, mineral metabolism or vascular access, may produce benefits for patient care which are beyond expectations.

Amgen Australia are proud to announce that, through the ANZSN, it will support the Nephrology Community by providing five (5) grants of \$10,000 each to support projects aimed at improving patient care and clinical outcomes.

The projects for which the grants will be allocated should address the care of pre-dialysis, dialysis and transplanted patients; initiatives that improve both efficiency and quality of services will be given special consideration.

Applications are welcomed from nephrologists, nurses and allied health care professionals and will be reviewed by an independent panel of judges representing ANZSN, RSA and KHA.

Applications should be submitted by October 30, and the successful applicants will be announced on December 1, 2009.

Further application details are available at;
