PRESENTER
Dianne Du Toit

Dianne Du Toit is a Clinical Nurse Consultant at Wide Bay Hospital and Health Service, Fraser Coast Renal Services. Dianne extended her nursing scope of practice to remove tunneled haemodialysis catheters and is a founding member of the Australian and New Zealand Renal Access Nurses Network. She has 14 years’ experience in renal nursing including a position as the Renal Access Nurse at Gold Coast Hospital and Health Service from 2007 to 2013. She is formally trained and experienced in ultrasound assessment of vascular access including ultrasound visualised cannulation. Dianne is an advocate for utilisation of ultrasound in renal units by dialysis and CKD nurses. She has presented and run workshops nationally and internationally on renal access care.

PRESENTER
Vicki Smith

Vicki Smith has worked in Haemodialysis for over 16 years with the last 6 years as a Vascular Access Clinical Nurse Consultant. Vicki is the convenor of The Advanced Care Workshop for Vascular Access that is held annually in Geelong that focuses on the importance of the use of ultrasound in Dialysis Units. She has a Masters of Advanced Practice and has recently published the journal article “Plastic cannula use in Haemodialysis” with Monica Schoch.
