Enabling Javascript

**Google Chrome**
- Click on the three vertical dots in the top right hand corner and select ‘Settings’ from the drop down menu.
- Under ‘Settings’ click on ‘Advanced’.
- Under ‘Privacy and security’ click on ‘Content Settings’.
- Click on ‘JavaScript’ and allow by moving the slider to the right.
- Refresh the page.

**Internet Explorer**
- Select the Gear in the upper-right corner of the screen or the ‘Tools’ menu if you have the menu bar enabled, then select ‘Internet Options’.
- Select the ‘Security’ tab.
- Select the zone you wish to modify. In most cases, it will be ‘Internet’.
- Select the ‘Custom level...’ button.
- Scroll down to the ‘Scripting’ area and select the radio button to ‘Enable’ or ‘Disable’ it ‘Active scripting’.
- Select ‘OK’, then ‘OK’ again.

**Mozilla Firefox**
- Open a new tab. In the address bar, type about:config and press Enter.
- Click ‘I accept the risk!’ if a warning message appears.
- In the search box, search for javascript.enabled
- Toggle the ‘javascript.enabled’ preference (right-click and select ‘Toggle’ or double-click the preference) to change the value from ‘false’ to ‘true’.
- Go back to RSA website tab and refresh the page.
Apple Safari

- On the web browser menu click on the ‘Edit’ and select ‘Preferences’.
- In the ‘Preferences’ window select the ‘Security’ tab.
- In the ‘Security’ tab section ‘Web content’ mark the ‘Enable JavaScript’ checkbox.
- Click on the ‘Reload the current page’ button of the web browser to refresh the page.
