Technical Aspects of Dialysis

Education session covering blood results, biofeedback mechanisms, bio-impedance analysis and ultrasound equipment/techniques.

In this session we will:

- Review and enhance some technical aspects of dialysis.
- Reviewing the common blood tests that we perform in haemodialysis, how to interpret results and how to manage the results.
- Hearing about new bio feedback technology for haemodialysis.
- Observing how body water can be measured by using bioimpedance analysis, the theory and practice of this measurement will be presented by the Fresenius Medical Care expert. The opportunity to have a practice with the machine will be available.
- Reviewing the resources available for visualising and mapping vascular access presented by Western biomedical. Opportunity to have a practice with the equipment will be available.
- Online registration and payment now open – via www.renalsociety.org/education/calendar/
  Please note that registrations close on Tuesday 12 April

The RSA WA Branch and the Organising Committee would like to thank our corporate sponsors for their generosity in supporting our event:
